

1**Log in**

Open a web browser and enter url for firewall (e.g [https://\\$cust-id-vpn.fw.bahnhof.net](https://$cust-id-vpn.fw.bahnhof.net))
Log in with provided username and password

**2**

In the upper right corner; choose "options"

3

Download correct Network extension client for your Operating system.

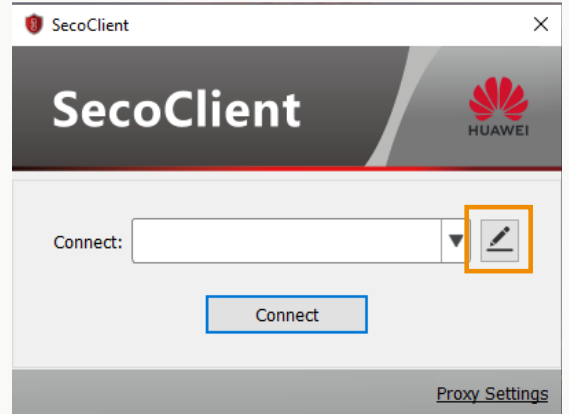

**4**

Follow the installation wizard for SecoClient.

When installation is complete, we need to create a connection profile towards the VPN gateway.

5

Open SecoClient and click the pen

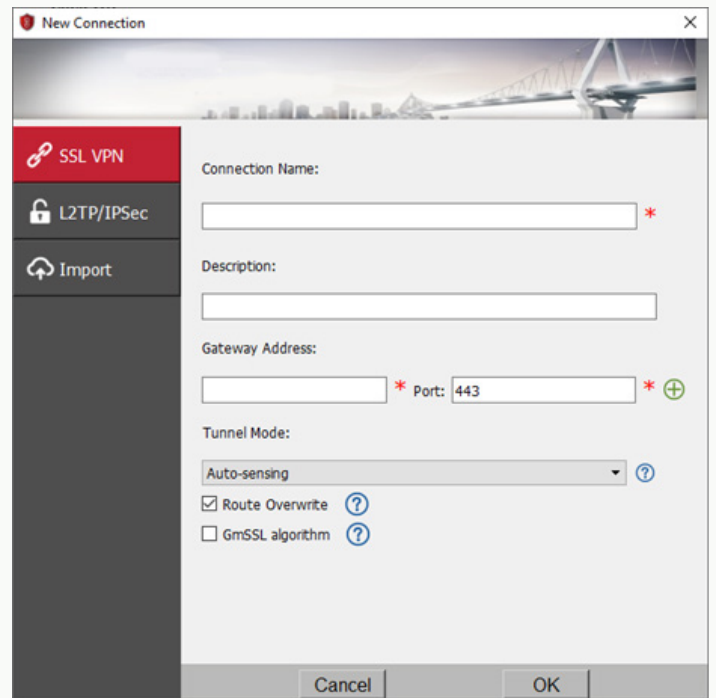

6

Fill in the fields

Connection name: Set this to something appropriate
Gateway Address: IP-to-firewall

Click OK

7

Almost done!

Now choose the connection profile we just created and click connect.

Enter password for your user, then login.
